

The Honorable Michael K. Powell
Chairman
Federal Communications Commission
445 12th Street, S.W.
Washington, D.C. 20554

Dear Chairman Powell:

I'm writing to urge you to support the proposed merger between EchoStar Communications and Hughes Electronics. I believe the merger holds tremendous potential for my company in Clarksville, MD which sells EchoStar's DISH Network satellite TV service. The new company will offer a more attractive product to consumers, and this will mean more business for my company.

The majority of my customers are not able to subscribe to their local broadcast channels via satellite because they live in the Baltimore television market, which is available on DirecTV only and we are not a DirecTV dealer. Because DISH Network does not have sufficient spectrum to provide local channels in our primary market, our customers have no choice but to buy off-air antenna systems which cost two to three times more than the DISH satellite systems. Because of this added expense, we lose a large number of potential customer to DirecTV dealers, and to the local cable company, which supplies inferior quality programming.

Currently, EchoStar offers local broadcast channels in only 36 markets. The merger will allow the combined company to stop broadcasting more than 500 identical TV channels. This will increase capacity and allow the new company to serve all TV markets in the U.S. This will allow me to offer my customers a more competitive alternative to cable in the near future.

If the merger is approved, the new EchoStar will provide consumers in my area an affordable high speed Internet access service via satellite. There are a small number of customers in my area who do enjoy access to high-speed Internet access service via cable and DSL service. For them, this merger will result in increased competition in the broadband market, potentially driving down prices of DSL and cable providers. However, the majority of the homes, schools and businesses in my area are beyond the reach of cable and DSL wires. For these customers, the new EchoStar would be their only chance of getting an affordable high speed Internet service.

This merger will increase satellite TV's ability to respond competitively to the roll out of digital cable, forcing cable companies to respond in a variety of ways including accelerating their digital upgrades and extending their wires out to reach those customers they currently do not serve. The resulting expansion in digital capabilities across the board will increase competition generally, will drive hardware upgrades for consumers, and drive retail traffic and sales nationwide.

Since its inception, direct broadcast satellite TV providers have offered uniform, nationwide pricing structures, and the new company has guaranteed that it will continue this practice. Nationwide pricing offers customers in rural America the full benefits of the rigorous competition occurring in urban and

suburban areas. I can rest assured that satellite TV will remain a competitively priced product.

Please support the merger between EchoStar Communications Corporation and Hughes Electronics. There are many benefits of the merger, but I believe that most importantly, the new company will increase competition with cable and help hold down cable rate increases. These savings, in turn, will be passed along to customers, which will be good for my business.

Sincerely,

Larry Sturgill
